Profile Summary

Certified Ethical Hacker with 1.5+ years of hands-on experience in VAPT across web and network environments. Successfully executed 20+ security assessments, uncovering critical vulnerabilities and delivering actionable remediation. Skilled in offensive security, red teaming, and threat detection using tools like Burp Suite, Metasploit, Nmap and Wazuh. Focused about strengthening cyber defenses through real-world attack simulations and risk-based security strategies.

Experience

Cyber Security Engineer, Cyberjeet Pvt Ltd,
Bengaluru, Karnataka.

Oct 2024 - Present

Vulnerability Assessment Penetration Testing (VAPT)

- Performed in-depth vulnerability assessments and penetration testing, leveraging OWASP Top 10 methodologies to identify and exploit security weaknesses.
- Executed 18+ VAPT projects covering both infrastructure and web applications, ensuring comprehensive security coverage.
- Conducted both manual and automated security testing to uncover critical vulnerabilities, including Cross-Site Scripting (XSS), SQL Injection (SQLi), Cross-Site Request Forgery (CSRF), and broken authentication mechanisms.
- Developed comprehensive vulnerability reports with risk assessments, proof-of-concept (PoC) exploits, and actionable remediation strategies to strengthen security defenses.
- Executed VAPT across multiple environments, including Web Applications, Android Applications, Active Directory, and Network Infrastructure, ensuring robust security postures.
- Utilized security tools like Burp Suite, Nmap, Nikto, Metasploit, OWASP ZAP, SQLMAP, CrackMapExec, Mimikatz, Sublist3r, Ettercap, Hashcat, Responder, Winpeas, Linpeas, Bloodhound, Impacket, Recon_Ninja, and Mobile Security Framework (MobSF) for vulnerability assessments.
- Provided actionable remediation guidance and security hardening recommendations to development and infrastructure teams.

Key Achievements:

- Participated in **CERT-In** web application security assessment, identifying 50+ vulnerabilities during cybersecurity examination.
- Conducted **Nessus** Professional Vulnerability Scanning Tool training for the **CPRI** (Central Power Research Institute) Security Team, covering installation, configuration, policy creation, scanning methodologies, and best practices for enterprise vulnerability management.
- Performed onsite network VAPT assessments to identify exploitable vulnerabilities across internal infrastructure.
- Enabled organizations to meet compliance standards by mitigating high-risk vulnerabilities.
- Strengthened application and infrastructure security through tailored VAPT strategies and best practices.

Wazuh Security Monitoring

- Deployed and configured Wazuh for SIEM, log monitoring, and threat detection.
- Developed custom rules to detect specific threats and ensure compliance with organizational policies.
- Integrated Wazuh with other security tools to improve overall incident response capabilities.

Key Achievements:

- Improved system visibility through comprehensive logging and monitoring.
- Streamlined security operations through tool integration and automation.

Projects & Tools Developed

Recon_Ninja – Advanced Bug Bounty Recon Automation Tool ([Link](#))

- A Python-based reconnaissance tool integrating Subfinder, httpx, waybackurls, gau, gf, nuclei, katana, and custom filters.
- Supports single domain and bulk recon mode using -d or -l options.
- Generates vulnerability findings using custom Nuclei templates (-t) and organizes results into structured output directories (-o).
- Automates subdomain enumeration, endpoint discovery, probing, filtering, and vulnerability scanning.

HTML Injection Scanner – Automated HTML Content Injection Detection Tool ([Link](#))

- A CLI-based Python tool designed to detect HTML Injection vulnerabilities using crawling, payload fuzzing, and filtering.
- Supports crawling (--crawl) and deep crawling (--deep) up to 200 URLs.
- Allows custom payloads (-p).
- Multi-threading support (-t).
- Exports results in JSON or CSV for reporting (-o).

Certifications

Certified Ethical Hacker (CEHv12), EC-Council

Skills

- Penetration Testing: Metasploit, Burp Suite, OWASP ZAP, Wireshark, Nmap, Hydra, Nuclei, Nikto.
- Network Security: TCP/IP, Firewalls, VPNs, Load Balancer, WAF, SIEM.
- Vulnerability Assessment: Nessus, OpenVAS.
- Web Application Security: OWASP Top 10, SQL Injection, XSS, CSRF, SSRF, LFI, Open Redirect.
- Operating Systems: Linux, Windows, Ubuntu.
- Web Application Firewalls: Configuration and management of WAFs to protect web applications.
- Phishing and Social Engineering Defense: Techniques to identify and mitigate phishing attempts and social engineering attacks.
- Open-Source Intelligence (OSINT): Techniques for gathering and analyzing publicly available information for threat intelligence.

Education

- **Bachelor of Computer Applications** Sep 2020 – Aug 2023

Surana College Peenya
Bangalore-560022.

Soft Skills

- Technical Report Writing
- Problem-Solving Skills
- Communication Skills
- Attention to Detail
- Team Collaboration
- Multi-project Delivery
- Time Management
- Ethical Judgment

Languages

- English, Kannada, Marathi, Telugu, Hindi
